

Desafio - Entrega Final: Implantação PortfolioHUB + IA GEMINI

Objetivo Geral:

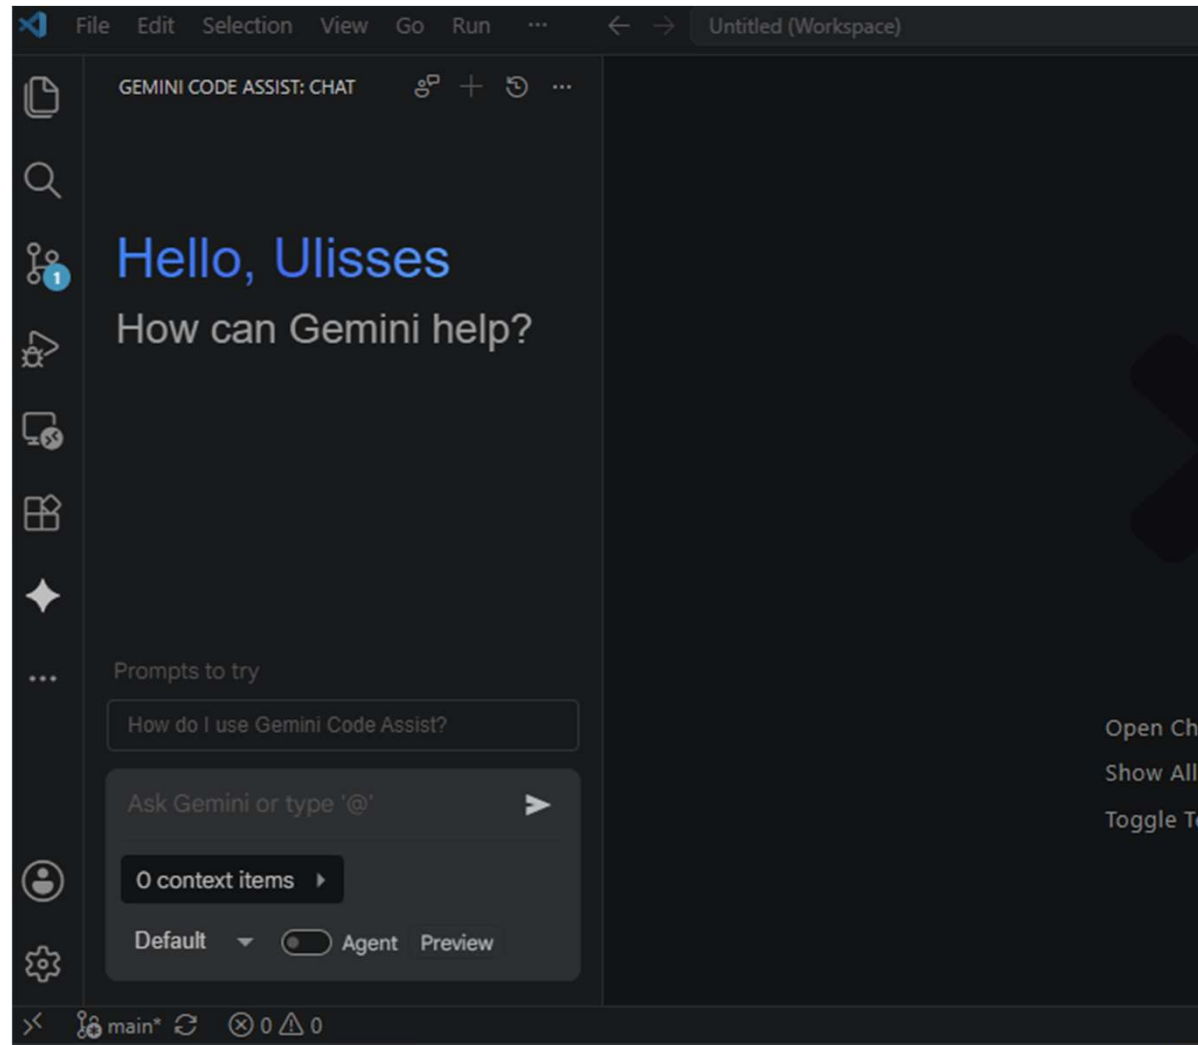

Este desafio guiará o estudante por meio do processo completo de implantação do PortfolioHUB, garantindo que adquira habilidades práticas na integração do GitHub e segurança, enquanto utilizam o Google GEMINI como apoio na implementação.

1 - Planejamento da Implantação

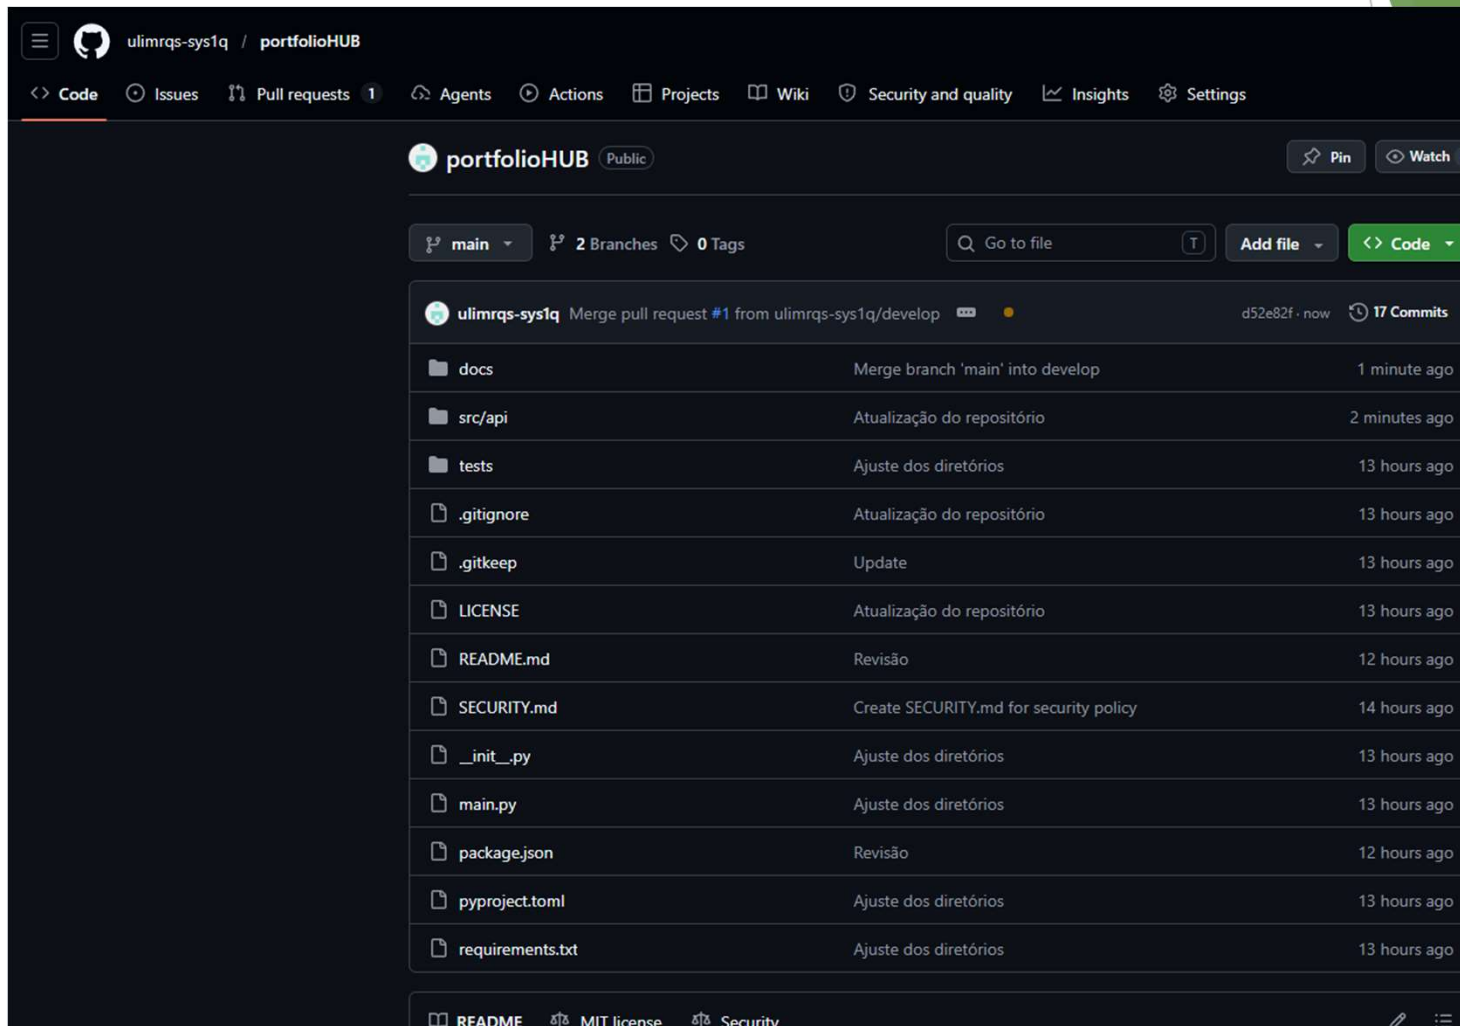

<https://github.com/ulimrqs-sys1q/portfolioHUB/tree/main/docs/Documentação>

1 - Planejamento da Implantação

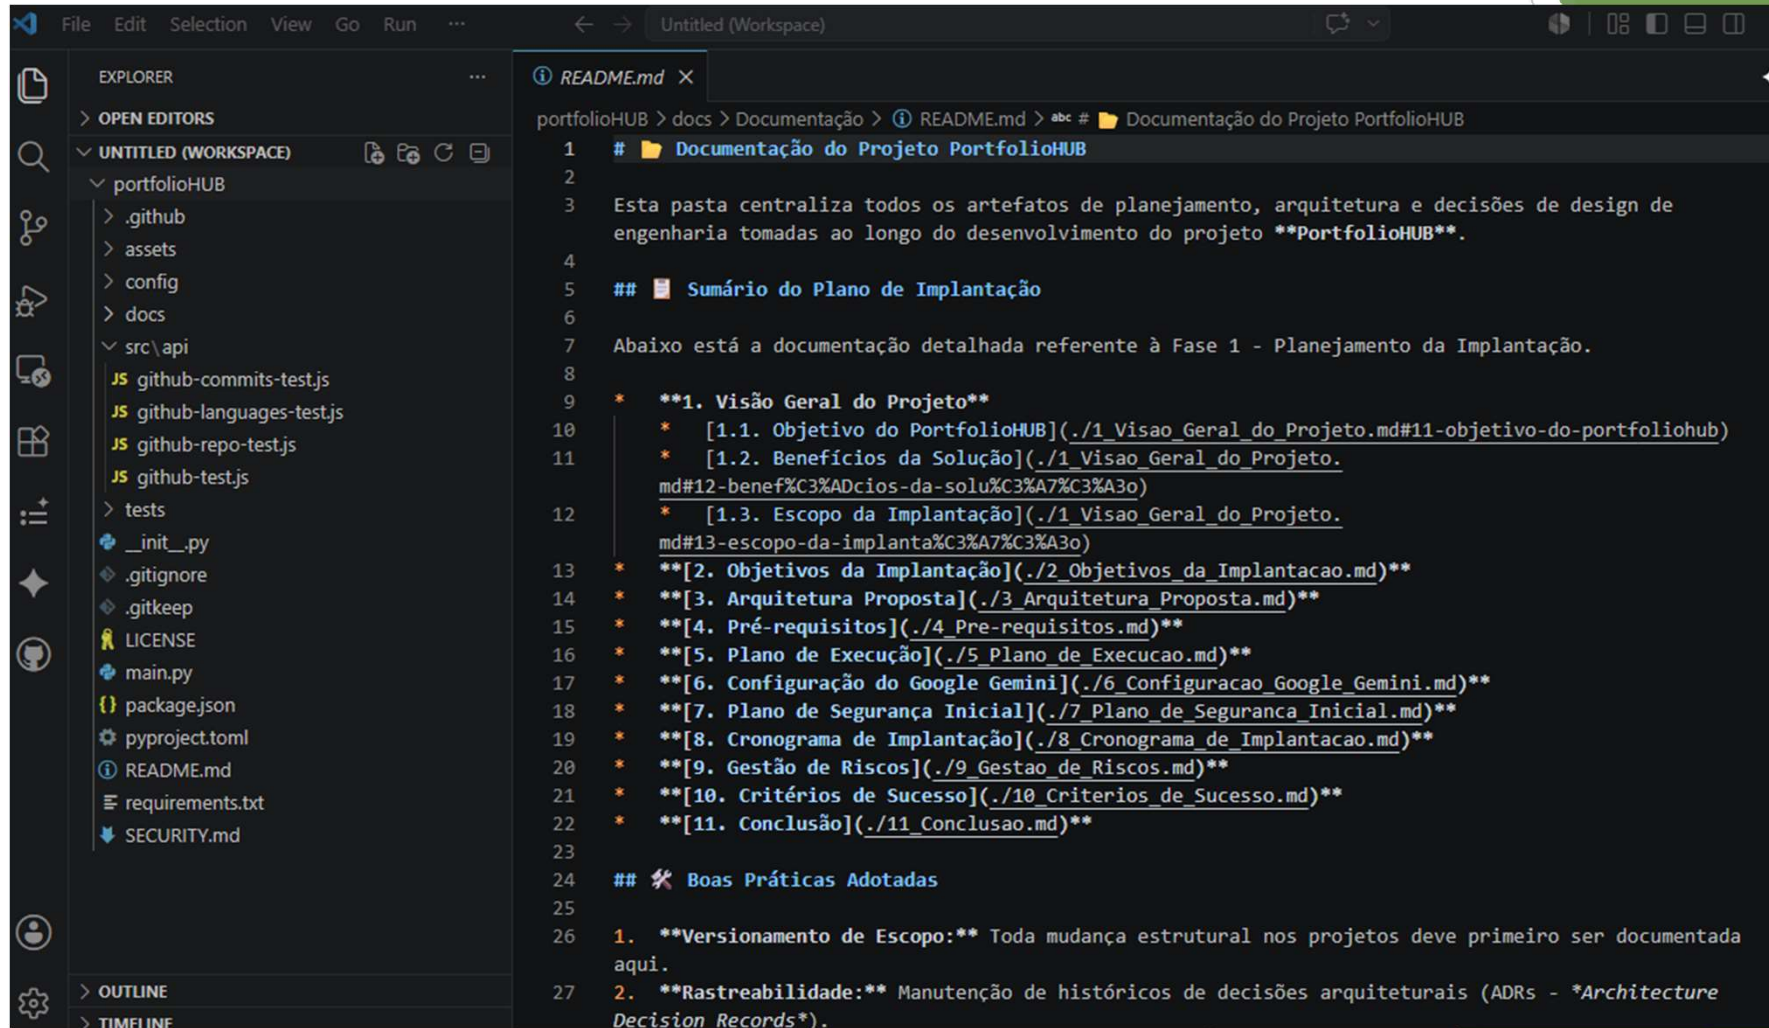

2 - Configuração Inicial e Integração com Github

<https://github.com/ulimrqs-sys1q/portfolioHUB>

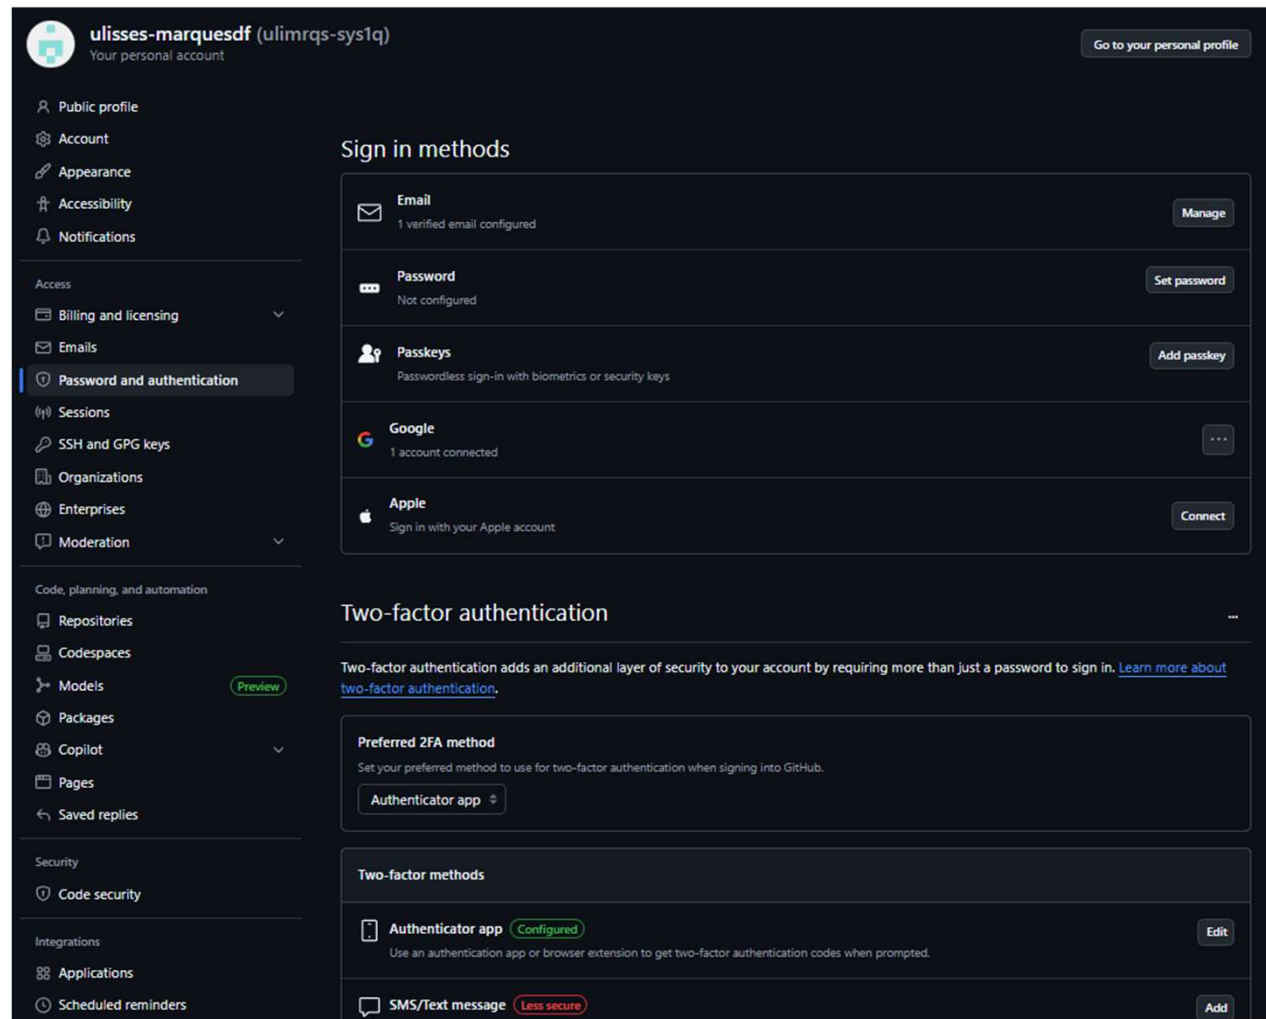

2 - Configuração Inicial e Integração com Github

The screenshot displays a code editor interface with a dark theme. On the left, the 'EXPLORER' sidebar shows a project structure for 'portfolioHUB'. The 'src\api' directory contains several JavaScript files for testing GitHub integrations. The 'tests' directory includes an 'init.py' file. Other files in the root include '.gitignore', '.gitkeep', 'LICENSE', 'main.py', 'package.json', 'pyproject.toml', 'README.md', 'requirements.txt', and 'SECURITY.md'. The main editor area shows the 'README.md' file, which is titled 'Documentação do Projeto PortfolioHUB'. The content of the README includes a description of the project's purpose, a table of contents, and a list of adopted best practices.

```
1 # Documentação do Projeto PortfolioHUB
2
3 Esta pasta centraliza todos os artefatos de planejamento, arquitetura e decisões de design de
4 engenharia tomadas ao longo do desenvolvimento do projeto PortfolioHUB.
5
6 ## 📄 Sumário do Plano de Implantação
7
8 Abaixo está a documentação detalhada referente à Fase 1 - Planejamento da Implantação.
9
10 * 1. Visão Geral do Projeto
11 * [1.1. Objetivo do PortfolioHUB](./1_Visao_Geral_do_Projeto.md#11-objetivo-do-portfoliohub)
12 * [1.2. Benefícios da Solução](./1_Visao_Geral_do_Projeto.md#12-benef%C3%ADcios-da-solu%C3%A7%C3%A3o)
13 * [1.3. Escopo da Implantação](./1_Visao_Geral_do_Projeto.md#13-escopo-da-implanta%C3%A7%C3%A3o)
14 * 2. Objetivos da Implantação(./2_Objetivos_da_Implantacao.md)**
15 * 3. Arquitetura Proposta(./3_Arquitetura_Proposta.md)**
16 * 4. Pré-requisitos(./4_Pre-requisitos.md)**
17 * 5. Plano de Execução(./5_Plano_de_Execucao.md)**
18 * 6. Configuração do Google Gemini(./6_Configuracao_Google_Gemini.md)**
19 * 7. Plano de Segurança Inicial(./7_Plano_de_Seguranca_Inicial.md)**
20 * 8. Cronograma de Implantação(./8_Cronograma_de_Implantacao.md)**
21 * 9. Gestão de Riscos(./9_Gestao_de_Riscos.md)**
22 * 10. Critérios de Sucesso(./10_Criterios_de_Sucesso.md)**
23 * 11. Conclusão(./11_Conclusao.md)**
24
25 ## 🌟 Boas Práticas Adotadas
26
27 1. Versionamento de Escopo: Toda mudança estrutural nos projetos deve primeiro ser documentada aqui.
28 2. Rastreabilidade: Manutenção de históricos de decisões arquiteturais (ADRs - Architecture Decision Records).
```

3 - Gestão de Usuários e Segurança

The screenshot displays the GitHub account settings interface for the user 'ulisses-marquesdf' (ulimrqs-sys1q). The left sidebar contains navigation links for Public profile, Account, Appearance, Accessibility, Notifications, Access, Billing and licensing, Emails, Password and authentication (selected), Sessions, SSH and GPG keys, Organizations, Enterprises, Moderation, Code, planning, and automation, Repositories, Codespaces, Models (with a Preview button), Packages, Copilot, Pages, Saved replies, Security, Code security, Integrations, Applications, and Scheduled reminders. The main content area is divided into two sections: 'Sign in methods' and 'Two-factor authentication'. The 'Sign in methods' section lists Email (1 verified email configured), Password (Not configured), Passkeys (Passwordless sign-in with biometrics or security keys), Google (1 account connected), and Apple (Sign in with your Apple account). The 'Two-factor authentication' section includes a 'Preferred 2FA method' dropdown set to 'Authenticator app' and a list of 'Two-factor methods' showing 'Authenticator app' as 'Configured' and 'SMS/Text message' as 'Less secure'.

Your personal account

Go to your personal profile

Sign in methods

- Email: 1 verified email configured. [Manage](#)
- Password: Not configured. [Set password](#)
- Passkeys: Passwordless sign-in with biometrics or security keys. [Add passkey](#)
- Google: 1 account connected. [...](#)
- Apple: Sign in with your Apple account. [Connect](#)

Two-factor authentication

Two-factor authentication adds an additional layer of security to your account by requiring more than just a password to sign in. [Learn more about two-factor authentication.](#)

Preferred 2FA method
Set your preferred method to use for two-factor authentication when signing into GitHub.
[Authenticator app](#)

Two-factor methods

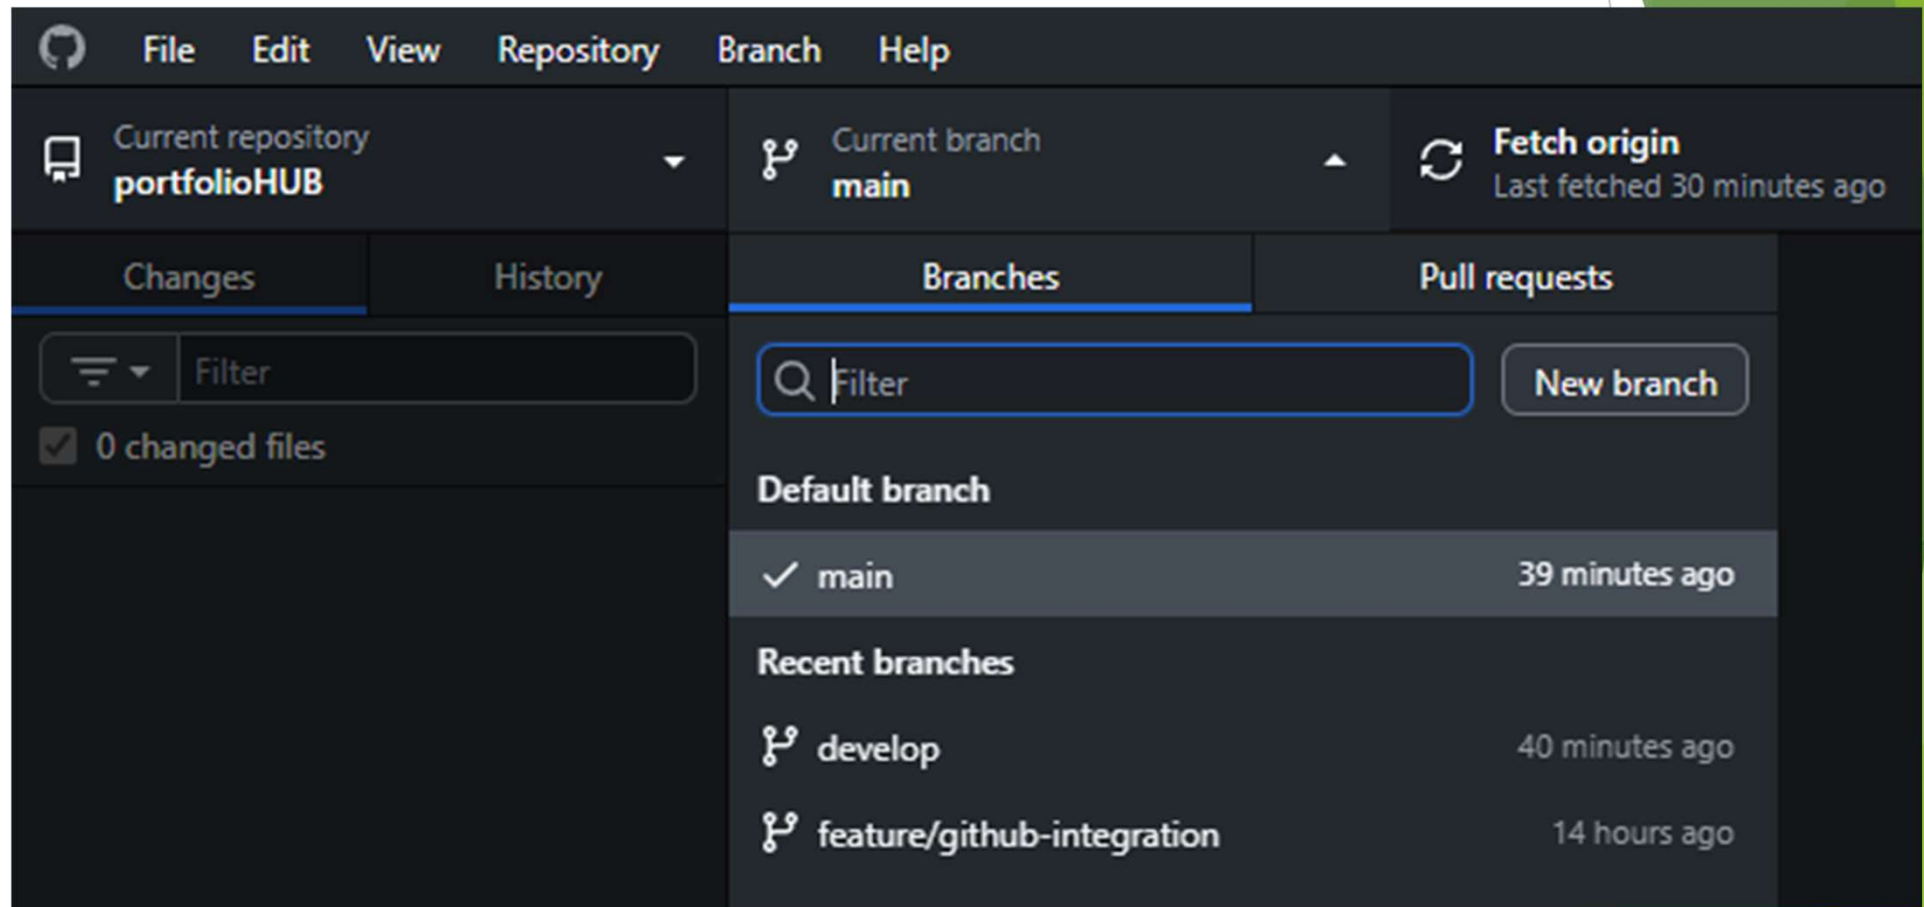

- [Authenticator app](#) **Configured** [Edit](#)
Use an authentication app or browser extension to get two-factor authentication codes when prompted.
- [SMS/Text message](#) **Less secure** [Add](#)

3 - Gestão de Usuários e Segurança

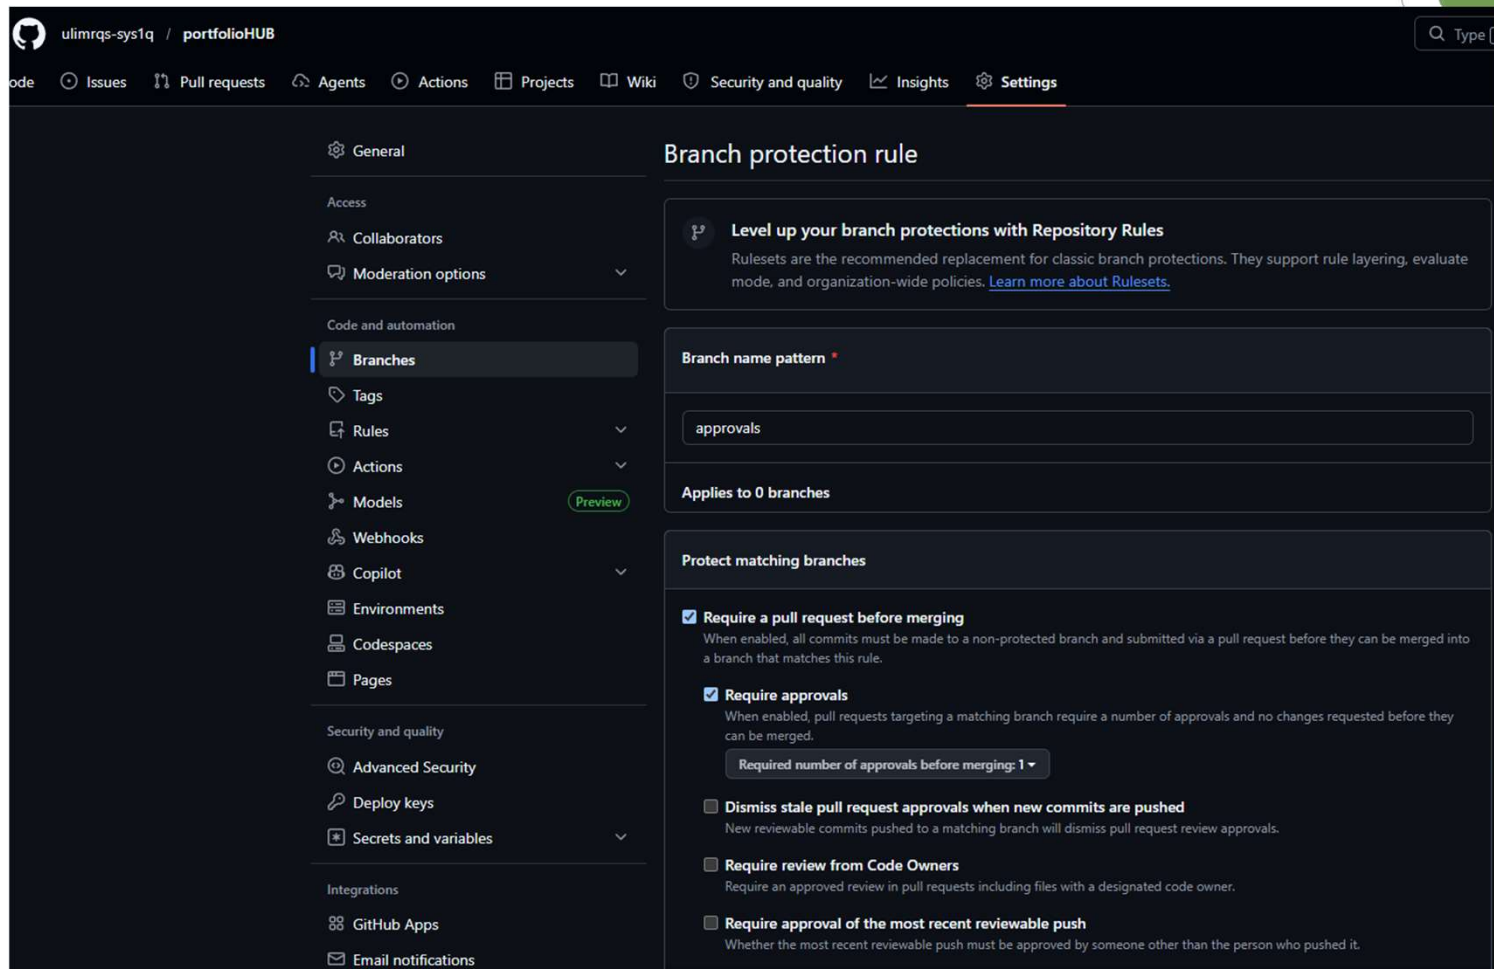

The screenshot displays the GitHub interface for the repository 'ulimrqs-sys1q / portfolioHUB'. The top navigation bar includes links for Code, Issues, Pull requests (1), Agents, Actions, Projects, Wiki, Security and quality (active), Insights, and Settings. A search bar is located on the right. The left sidebar, titled 'Security and quality', contains a list of options: Overview (selected), Findings, Dependabot (with sub-items Malware and Vulnerabilities), Code scanning, Secret scanning, Reporting, Security policy, and Advisories. The main content area, titled 'Overview', lists several security features and their status:

- Security policy** • Enabled: View how to securely report security vulnerabilities for this repository. [View security policy](#)
- Security advisories** • Enabled: View or disclose security advisories for this repository. [View security advisories](#)
- Private vulnerability reporting** • Disabled: Allow users to privately report potential security vulnerabilities. [Enable vulnerability reporting](#)
- Dependabot alerts** • Enabled: Get notified when one of your dependencies has a vulnerability. [View Dependabot alerts](#)
- Code scanning alerts** • Enabled: Automatically detect common vulnerability and coding errors. [View alerts](#)
- Secret scanning alerts** • Enabled: Get notified when a secret is pushed to this repository. [View detected secrets](#)

5 - Finalização da Integração e Testes

The screenshot shows the GitHub Actions interface for the repository `ulimrqs-sys1q / portfolioHUB`. The left sidebar contains the 'Deployments' section with 'All deployments' selected. The main area displays 'All deployments' with a summary card for 'github-pages' and a list of 11 deployments.

Summary Card:

- github-pages** (status: success)
- Last deployed: 25 minutes ago
- URL: <https://ulimrqs-sys1q.github.io/portfolioHUB/>

Filter: Filter deployments

11 deployments

Deployment Name	Deployed to	Deployed by	Environment	Time	Actions
Merge pull request #1 from ulimrqs-sys1q/develop (Active)	github-pages	ulimrqs-sys1q	main (#1)	25 minutes ago	...
Revisão	github-pages	ulimrqs-sys1q	main	13 hours ago	...
Delete Documentação directory	github-pages	ulimrqs-sys1q	main	13 hours ago	...
Ajuste dos diretórios	github-pages	ulimrqs-sys1q	main	13 hours ago	...
